Arvada, CO | [linkedin.com/in/rachel-e-hull](https://www.linkedin.com/in/rachel-e-hull) | rachel.hull.mktg@gmail.com

Lifecycle marketer specializing in activation, adoption, and expansion in product-led SaaS. Turns behavioral data into systems that move users from intent to action.

PLG Lifecycle Strategy | Behavioral Automation | Segmentation & Personalization | Onboarding & Activation | Feature Adoption & Retention | Experimentation & A/B Testing | B2B2C Lifecycle Systems | Analytics & Measurement | Platform Migrations & Infrastructure | Copywriting & Messaging

WORK EXPERIENCE

TurboTenant Senior Lifecycle Marketing Manager | February 2024 – March 2026

- Owned activation and adoption lifecycle strategy in a PLG model, driving **+72% lift in feature adoption, +11% increase in onboarding conversion, and +5% lift in key activation flows.**
- Built a behavioral lifecycle system using event-triggered messaging, segmentation, and sequencing to drive onboarding, feature adoption, and re-engagement across the user lifecycle.
- Led a structured experimentation program across lifecycle touchpoints, testing messaging, timing, and segmentation to optimize conversion and inform product positioning.
- Designed vacancy-to-retention campaign for low-adoption users, driving Rent Payments adoption from **under 5% to 40%** – an eightfold increase – to prevent churn in a transactional segment with 95% within-year dormancy.
- Executed freemium-to-subscriber retargeting using behavioral event triggers combined with business-level attributes (property count, tenure, self-reported priorities), achieving **15% lift in subscription conversions.**
- Migrated fragmented martech stack (Klaviyo, Intercom, SendGrid) to Customer.io, enabling personalized event-triggered campaigns, channel expansion to SMS and push, and structural A/B testing previously blocked by legacy architecture.

Snagajob.com Senior Lifecycle Marketing Manager, Worker | March 2022 – October 2023

- Drove lifecycle strategy resulting in **20%+ growth in visits and revenue.**
- Rebuilt Adobe Analytics event structure and reporting framework from scratch; applied new measurement visibility to diagnose a high-volume underperforming series (~80% of sends), driving **31% revenue growth, 6.7% visit growth, and 22% reduction in send volume.**
- Built predictive B2B2C campaign using workers' application history to surface relevant job opportunities – behavioral-signal-to-journey logic analogous to PLG upsell systems – producing **20% more return visits** than control.
- AI-assisted campaign content drove **70% more return visits than average**; AI-generated personas became a core input to the team's segmentation and prioritization framework.

Conduent, Inc. Lifecycle Marketing Manager, BenefitWallet | January 2018 – May 2022

- Built de novo lifecycle email program for 5MM users, driving activation, adoption, and re-engagement from scratch.

- Quadrupled activation rate of an adoption-resistant segment from **5% to 27%** through a targeted, behavior-triggered email sequence.
- Designed B2B2C campaigns to employees on behalf of employer clients: more employee HSA/FSA contributions meant greater tax savings for employers — a recurring revenue and engagement model.

OTHER WORK EXPERIENCE

Wells Fargo Bank (Multiple Marketing and Product roles) | (12 years)

- Generated **\$6M+ annual revenue** via pricing strategy; improved revenue forecast accuracy from 10% to ~2%.
- Launched new product generating **\$3M annual revenue** within two years using early A/B testing and direct marketing.
